Ciphix RPA Academy

Robotic Process Automation – Ciphix RPA Applicants Course

UiPath™

Welcome to the Ciphix Academy!

CIPHIX

Let’s start your RPA journey together!

Are you ready?

C1PH1X

Introduction

The Ciphix Academy for RPA Applicants

Hi there! Welcome to the Ciphix Academy where we're going to show you all the wonders of Robotic Process Automation (RPA) and teach you the most important facets to finish the RPA Case for your application at Ciphix!

Repetitive and boring tasks shouldn't be done by humans, and that's why we want to show you how to take the Robot out of the human!

C1PH1X Academy

"Stay Hungry And Evolve Together"

Introducing Ciphix

About us

Introducing Ciphix

Our Team & Mission

Ciphix is a Rotterdam-based IT implementation company dedicated to **helping organizations unlock human potential** through smarter business process automation. With an integrated approach to RPA and Machine Learning, we're able to offer our clients – including global brands and government organizations – **uniquely robust solutions** to their business challenges. Ciphix is built on the belief that properly implemented RPA will change the world for the better – and that belief grows stronger with every digital workforce we deploy. We're energized by the game-changing opportunities at the intersection of RPA and AI technology and if you're ready to put them to work for your organization, Ciphix is at your service.

Though we love a good puzzle, our core mission is pretty simple: to empower people to be more *human* through the innovative use of technology. Because the only thing that we love more than deploying robots, is helping humans!

Take the robot out of the human

Together we build robust and maintainable solutions from a technical foundation. Our ***mission*** *is to help organizations build a* ***true digital workforce.***

Introducing Ciphix

Building a digital workforce

A Digital Workforce consists of a set of technologies that substitute human execution of a **repetitive, manual** or **cognitive process**. Ciphix implements these technologies in synergy, to accomplish our mission of ***Taking the robot out of the human***.

Robotic Process Automation
Put work overload in the past

Act

Artificial Intelligence
Building the brains

Think

Conversational Automation
The right conversation at the right time

Communicate

Since our start we have saved over 300.000 annual hours of manual labor

Expectations

What to expect in this course?

Expectations

RPA Applicants Course

In this RPA course we're going to introduce and discuss the basic concepts of UiPath. You will learn how to automate the web and some common software.

Each topic is introduced with a Video where we will explain the definition of this topic, why it is used and how and when you are using it. This explanation also contains an example in UiPath such that you will easily get familiar with the interface of the application. After this video there are a few slides to let you go through the discussed information again and remember the important key takeaways for this topic.

When you're done with all the theory, you can do the exercises to practice your UiPath skills. Hereafter, you will be ready to finish the RPA case and send in your solution! Please note that you are not obliged to finish this course, but that it is only recommended to make the RPA case. If you want to learn more about the topics you can always visit UiPath's documentation website or the UiPath Forum.
